

**Grand Prairie Friends
Site Inspection Information for Land Conservation Project**

*This form is to gather and compile information needed to complete a land preservation project.
This form should be used during preliminary site visits and conversations with the landowner.*

Name of Project:

Contact Information (landowner and any authorized representative):

Name(s):

Address:

Phone Number(s):

Email Address:

Physical Address of the Property:

County, Nearest Town:

Proposed Transaction Type

- Fee Acquisition Land Purchase
- Conservation Easement: Donation ____, Bargain Sale ____, or Purchase _____
- Land Donation
- Land Bargain Sale
- Land Transfer
- Other: _____

Landowner Goals

Property Information

Total Number of Acres: _____

Directions to the Property:

General description of property:

Current zoning:

Current land use:

Past land use:

Surrounding land uses:

Current Property Improvements:

Well or cistern (active or abandoned):

Proposed Property Improvements, if any (for conservation easements or if GPF plans to make improvements):

Resource Management: Describe any of the following that apply. If project is a conservation easement, describe how the landowner wishes to address these. Note whether a management plan would be necessary.

Natural Communities and Wildlife Resources (including rare species):

Farmland and/or Developed Areas:

Mining, Oil, and Gas Resources:

Recreation:

Water Features (streams, wetlands, ponds, etc):

Archaeological Features:

Describe GPF's ability to fulfill stewardship responsibilities:

Conservation Values: Based upon the above information, describe potential values for conservation, education, and recreation. Include factors such as natural quality/condition of land, land connects to existing protected areas and enhances wildlife habitat, presence of threatened or endangered species, land provides public recreation opportunities consistent with protection of the natural resources.

Financial Information

Is it necessary to find funding for this project? If so, what are the anticipated sources?

Additional Information (freedom from hazardous waste contamination; title considerations; encroachments, conflicts of interest; public access; proximity to population centers for purposes of recreation, education or scenic enjoyment; potential for future management, monitoring, liability, or enforcement problems):
